

SUPPLIER PERFORMANCE

Industrias Ángel Martínez López s.l., La Piña, has defined the criteria to be followed for the initial evaluation, selection, performance monitoring and re-evaluation of external suppliers, in order to verify their suitability for the supply or work carried out in accordance with the established Quality and Environmental requirements.

SUPPLIER EVALUATION:

The Purchasing Manager and Management are responsible for the selection and evaluation of suppliers, determining their ability to comply with the Quality and Environmental requirements, based on the UNE ISO 9001: 2015 and UNE ISO 14001:2015 standards, which La Piña has established for its products.

Therefore, La Piña's Management informs that all our external suppliers will be subject to a continuous evaluation process and an annual re-evaluation, based on possible incidents in the products or services provided. If the evaluation is negative (the incident is very serious or repetitive), a formal communication will be made.
